Life is easy for our customers: no need to worry about **System Integration** nor troubleshooting. **Continuity is our motto**
- > **24x7 Support**  
Always-on remote NOC and onsite customer support. **Customer is never alone**

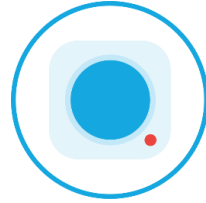

# NGO: dedicated solutions & services

## **VSAT**

For high speed data and voice transmissions over Ku, C and Ka band satellites.

**Video Surveillance** allows reliable and accurate records of the area.

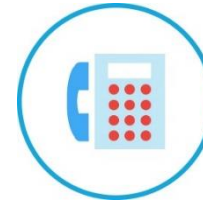

**IPTV** offers the ability to stream media on different devices like TVs, tablets and smart phones.

**Cyber Security** Protection is a need and the protection of our customers is a must.

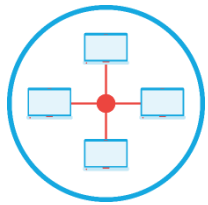

**Premium Hot Spot.** Customize, monetize and manage your Wi-Fi platforms.

## **VOIP4SAT**

Make and receive phone calls just like on a domestic phone.

## **Local Network Management.**

Our 24/7 NOC is immediately responsive in case of problems.

**Wi-Fi.** Satellite and 4G Internet connection can be distributed on board.

**VPN** provides dedicated links and bandwidth between different areas.

**Web Portal** provides real-time control of your remote Internet connection and other information.

# Milano Teleport - The VSat Specialist

**Milano Teleport VSAT service is based on global, regional and multi-regional coverages, directly managed by us**

- Thanks to its proprietary systems, Milano Teleport can support customers with full monitoring of a single ship or of the entire fleet, from technical data to detailed administrative information.
- Monitoring platforms and dashboards have been created to provide full real time overview of the VSAT installation, including modem and antenna, entailing a dramatic decrease in time spent in troubleshooting thanks to continuous monitoring.
- User interfaces have been designed to be highly productive placing all information immediately available. Milano Teleport is efficient and reliable VSAT as simple as a click.
