

# Hybrid Solution

  
**milanoteleport**  
the sky is not the limit

## Hybrid Solution

Thanks to an innovative **Automatic Roaming Technology**, Milano Teleport offers a **Hybrid Solution** that combines into a single package the best features available on **iDirect** and **Newtec Dialog**, the two leader sharing platforms available on VSAT market.

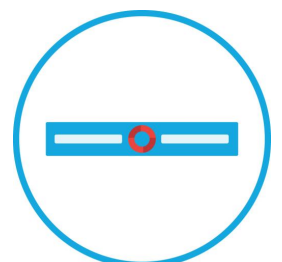

The Hybrid Solution helps our customers to break down barriers and give them the maximum flexibility.

### The Hybrid Solution Plusses

- > **iDirect** is the powerful solution when you need from small to medium service packages over wide multi-satellite coverage.
- > **Newtec Dialog** is the best solution if you need to access to very high throughput services during the “high season” on a regional coverage.

### The Hybrid Solution Benefits

- > Customers do not decide from the beginning everything related to their service and spend time and money in complex forecast to understand if their choice is the right one.
- > Benefit from high speed connection up to 100Mbps, and rely on iDirect for always-on back-up on multiple satellites (and ocean crossing)
- > Thanks to higher efficiency, take advantage of competitive prices on high speed connectivity

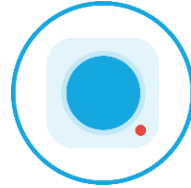

## ALL OUR SERVICES

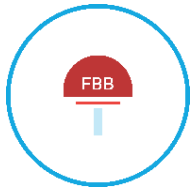

### VSAT

For high speed data and voice transmissions over Ku, C and Ka band satellites.

**Video Surveillance** allows reliable and accurate records of the area.

**Fleet Broadband** offers connectivity service & backup through L band capacity.

**Premium Hot Spot.** Customize, monetize and manage your Wi-Fi platforms.

**Iridium** keeps ships connected everywhere on the planet with pole-to-pole coverage.

**WI-FI & GSM.** Satellite and 4G Internet connection can be distributed on board.

**4G** connection is possible with a selection of SIM packages and different coverages.

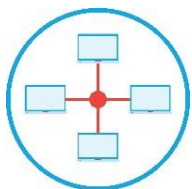

**Web Portal** provides real-time control of your remote Internet connection and other information.

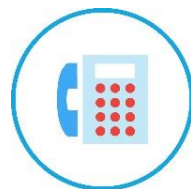

**Cyber Security** Protection is a need and the protection of our customers is a must.

**IPTV** offers the ability to stream media on different devices like TVs, tablets and smart phones.

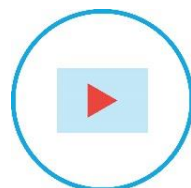

**Local Network Management** Our 24/7 NOC is immediately responsive in case of problems.

**VOIP4SAT** Make and receive phone calls just like on a domestic phone.

**VPN** provides dedicated links and bandwidth between different areas.

**SKY Service** offers the perfect solution for streaming high quality TV from SKY channels.
